SKILLS

JavaScript(ES6+)/Typescript/HTML5/CSS3	React/Next.js/PWA/Create-React-App/Vite
Redux/Hooks/Context API/Zustand/GraphQL	CSS/SASS/Tailwindcss/MUI/Styled-Components/Bulma
Storyblok/Storybook/Strapi/Sanity/Retool	Git/CI/CD/Github/Github
React Testing Library/Jest	Actions/Webpack/Postman/Swagger/Jira/Trello/Figma
Front-end design/Problem solving/Code review/Analytical skills	Familiar with: Node.js/Express/MongoDB/Rest API/Docker

PROFILE

Frontend Developer with **7+ years** of experience shipping performant, **scalable** React/Next.js applications. Passionate about crafting seamless **user experiences**, **collaborating** across teams, and embracing new tech (like AI) to build smarter, **faster** solutions.

PROFESSIONAL EXPERIENCE

Itabs Group, Senior Frontend Developer Jul 2025 – present
Istanbul, Turkey (Remote)

- Translated Figma designs into **pixel-perfect**, production-ready UI components with strong attention to detail.
- Implemented modular, reusable React components to enhance maintainability and reduce development time.
- Integrated data-driven dashboards with **interactive charts** for real-time insights and better user decision-making.

Homeservize , Frontend Developer Feb 2023 – present | Tehran, Iran (Remote)

- Built a scalable, **responsive web platform** with **2,000+ SEO-optimized service pages** using **Next.js (SSG & SSR & App Router)** and **Material UI**, resulting in a **25% increase in organic traffic**.
- Implemented **React Query** for state and cache management, reducing redundant API calls.
- Optimized performance and accessibility, increasing **Core Web Vitals** score from **54 to 90**, and reducing average page load time by **~2.3 seconds**.
- Integrated **PWA features** with push notifications, leading to a **15% increase in returning user engagement**.
- Set up centralized logging and monitoring with **OpenTelemetry**, improving issue detection.

Freelancer , Frontend Developer Sep 2022 – Dec 2024
Australia - Turkey - United States (Remote)

- Developed scalable React/Next.js applications for international clients using Sanity, Strapi, Retool, Material UI, and **Styled-Components** while **debugging** and optimizing frontend performance.

Asiatechin , Full Stack Developer May 2023 – Mar 2025 | Tabriz, Iran

- Developed a **client-facing website** and a **feature-rich admin panel** using **Next.js, TypeScript, and Tailwind CSS**, ensuring fast performance, clean code, and modern UI/UX across all platforms.

- Connected **Strapi CMS** as a headless backend for the website, enabling non-technical teams to manage content efficiently and reducing deployment bottlenecks by 50%.
- Built a role-based **user access system** in the admin panel, supporting multiple permission levels and improving operational security and efficiency.
- Connected the dashboard with **Rocket.Chat** [🔗](#) to send real-time messages on events like order submissions, improving team communication and visibility for managers.
- Utilized **Redux Toolkit** for predictable state management in complex UI flows, and implemented Excel-based reporting tools, giving admins dynamic insight into operations with minimal data entry.

Arkatech, Frontend Developer

May 2020 – Dec 2022 | Tabriz, Iran

Tabriz Valiasr Hospital [🔗](#) - Medical Portal

- Led development of a **multilingual medical portal** using **Next.js (with Incremental Static Regeneration)**, **React**, and **Tailwind CSS**, improving performance and accessibility for international patients.
- Collaborated closely with designers and UX teams to deliver a fully **responsive, user-centered interface** across devices.
- Developed an **admin panel** featuring rich text editors and **React Query** for efficient data fetching and state management.
- Utilized **TypeScript** to enhance code quality, maintainability, and minimize runtime errors across the portal.

GTA silver [🔗](#) - E-Commerce Platform

- Delivered a **responsive, SEO-optimized e-commerce frontend** using **React** and **Bulma**, supporting diverse product types and multiple user roles.
- Closely followed **Figma designs** to ensure pixel-perfect implementation and a consistent brand experience.
- Collaborated effectively with backend engineers and stakeholders to guarantee seamless functionality and timely deployment.

Menush - Restaurant Menu PWA

- Developed a **lightweight PWA** for restaurant menu browsing with **QR code scanning**, optimized for mobile performance and fast loading.
- Integrated **push notifications**, smooth **animations**, and modern UX for enhanced user engagement.
- Used **Husky** to enforce code quality and pre-commit checks, ensuring clean and maintainable codebase.

Mappit - Interactive Mapping Tool

- Built an interactive **map-based tool** using **Leaflet.js** with drawing capabilities to let users select areas directly on the map.
- Integrated with a custom API to calculate and display geographic area using **latitude and longitude**, enabling accurate field measurements.

YADAY(startup), Frontend Developer

Jul 2018 – Mar 2020 | Tabriz, Iran

- Built a **multilingual educational platform** using **React.js**, **Meteor.js**, and **Material UI**, supporting online classes and diverse user needs.
- Delivered a responsive, user-friendly interface that enhanced remote learning experiences across devices.

EDUCATION

Bachelor of Computer Engineering- IT, Tabriz University

Sep 2014 – May 2018

Final Project: Developed an Android app using Java as part of my final semester—my first commercial project that marked my entry into professional software development.
